

Reduced Dust Drilling Using Hilti TE-CD

"These Hilti TE-CD hollow drill bits have been used on various CRL sites and 'do what they say they will do' - reduce the production of air-borne dust, utilising the purpose designed sleeve on the shank, attached to a class M vacuum.

In addition to controlling dust, they clear the hole of debris to enable fixings to be installed more efficiently.

The link below demonstrates the bit effectiveness.

https://youtu.be/WHcbXV_vj5c"

(Please note, notwithstanding the hilti picture above, you still need to wear appropriate PPE & RPE when using these tools. Please check your RAMS for the appropriate PPE & RPE for the task)

35mm version of drill with vacuum sleeve
